MALGA BRENTA BASSA

Where to park

Drive along the road leading to the parking lot at Malga Brenta Bassa, go past the bridge over the Sarca di Vallesinella River and you will come to a large square. The surface of the area is made of rammed earth and spaces are limited.

For people with, or needing a disability parking pass, 4 adequately-sized parking spaces will be reserved at the beginning of the path.

REMOOVE staff will be available to facilitate entry/exit of the vehicle for those who so request

MALGA BRENTA BASSA

Access to the concert area

From the parking area, the access route to the concert area consists of an initial stretch along an uphill forest road with a hard and slightly uneven surface.
(1 km, 50 meters change in altitude, 10% max gradient).

MALGA BRENTA BASSA

After that, a short stretch (50 meters) of alpine meadow provides a clear path to the concert area. However, the naturally uneven conformation of the land requires caution and a steady foot. REMOOVE personnel will be available, for those who so request, to provide assistance and facilitate access to this last stretch, also for people using push or manual mobility aids.

Interested spectators are invited to contact our call center on 0464/076840 or email isuoniaccessibili@re-moove.it (WhatsApp 351 7181793)

MALGA BRENTA BASSA

Assistance, services

REMOOVE staff will be on hand for the entire duration of the concert to provide assistance and support to anyone requesting it.

A special Infopoint will be set up at the parking lot (REMOOVE signs on site) as well as a sun-shielded waiting area near the concert venue.

A service for ensuring accessibility with special REMOOVE bikes can be booked using the contacts given in the previous chapter.

Finally, electric Zoom vehicles suitable for off-road transport will be made available free-of-charge for people with impaired mobility requesting them. This service will be provided for the parking lot-concert area journey, where spectators will then have to stay with their own mobility aid.

Assistance, services

A chemical toilet that is also accessible to people with mobility aids will be located near the parking area of Malga Brenta Bassa.

PASSO DI LAVAZÈ

Listening

Thanks to the co-operation of the **Oriente Occidente Impresa Sociale-Ets**, the deaf or hard-of-hearing will also be able to enjoy the acoustic experience. REMOOVE will provide those who request them with **Subpac** devices, which are innovative audio-tactile instruments created for virtual reality experiences that are worn like backpacks and vibrate to the rhythm of the music, allowing sound perception through touch.

At the performances, thanks to the support of the **ENS-Ente nazionale Sordi**, (National Organization for the Deaf)'s experts, staff using sign-language will welcome the deaf spectators and explain how the Subpac works.

The availability of such devices is limited so those interested are invited to contact our call center on 0464/076840 or write to isuoniaccessibili@re-moove.it (WhatsApp 351 7181793)
