Where to park

A special parking area for people with disabilities has been set up near the square just above the Hotel Baita Giasenei. The surface of the area is covered with compact gravel and places are limited.

The path to exit the parking lot and reach the concert area has a moderately sloping section.

REMOOVE staff will be on hand to facilitate entry/exit of the vehicle for those who so request, as well as accessibility to the concert area.

It will be possible for everyone to park in the parking spaces provided 300 mt before the Chalet Giasenei, in the sportsground area.

Access to the concert area involves a walk of about 400 meters and crossing over a 30-meter change in altitude.

SAGRON MIS

Access to the concert area

The natural amphitheater can be accessed by walking downhill along the municipal road (which will be closed off to traffic for the event) and then across a short stretch of forest road (150 meters) with a compact and even surface.

SAGRON MIS

However, the naturally uneven land adjacent to the stage requires caution and a steady foot.

REMOOVE staff will be available for those who so request, to provide assistance and facilitate access, also for people with push or manual mobility aids.

Interested spectators are therefore invited to contact our call center on 0464/076840 or write to isuoniaccessibili@re-moove.it (WhatsApp 351 7181793)

SAGRON MIS

Assistance, services

REMOOVE staff will be on hand for the entire duration of the concert to provide assistance and support to anyone requesting it.

A special Infopoint will be set up at the entrance to the Villa (REMOOVE signs will be on site), as well as a sun-shielded waiting area near the concert venue.

A service for ensuring accessibility is provided with special REMOOVE bikes, which can be booked using the contacts provided in the previous chapter.

Finally, electric Zoom vehicles suitable for off-road transport will be made available free-of-charge for people with impaired mobility requesting them. This service will be provided for the parking lot-concert area journey, where spectators will then have to stay with their own mobility aid.

Listening

Thanks to the co-operation of the **Oriente Occidente Impresa Sociale-Ets**, the deaf or hard-of-hearing will also be able to enjoy the acoustic experience. REMOOVE will provide those who request them with **Subpac** devices, which are innovative audio-tactile instruments created for virtual reality experiences that are worn like backpacks and vibrate to the rhythm of the music, allowing sound perception through touch.

At the performances, thanks to the support of the **ENS-Ente nazionale Sordi**, (National Organization for the Deaf)'s experts, staff using sign-language will welcome the deaf spectators and explain how the Subpac works.

The availability of such devices is limited so those interested are invited to contact our call center on 0464/076840 or write to isuoniaccessibili@re-moove.it (WhatsApp 351 7181793)
