# VILLA WELSPERG

## Where to park

A special parking area for people with disabilities has been set up near the square in front of the entrance to the Villa.

The surface of the area is made of gravel/rammed earth and parking spaces are limited.

The route out of the parking lot has a moderately sloping ramp.

REMOOVE staff will be available to facilitate entry/exit of the vehicle for those who so request.

# VILLA WELSPERG

## Access to the concert area

Two routes have been determined to access the concert area from the parking lot. Both involve entering the villa area on the hard paved road without slopes.

# VILLA WELSPERG

## Access to the concert area

The first route passes the garden in front of the villa and leads toward the entrance to the vegetable garden. From here it will be possible to reach the area allocated for the public by crossing the meadow (even, but sometimes uneven ground) or, by following the fence to the left, joining the small paved road that characterizes the second route.

# VILLA WELSPERG

Total length of the route: 300 meters

# VILLA WELSPERG

## Access to the concert area

The second short itinerary runs along the north side of Villa Welsperg along a path with a compact, even surface. A gentle slope leads down to the forest, adjacent to the meadows where the concert will take place. Listening posts will be placed to ensure easy access and maximum visibility.

However, the naturally uneven conformation of the land requires caution and a steady foot.

REMOOVE staff will be available for those who so request, to provide assistance and facilitate access, also for people with push or manual mobility aids.

Interested spectators are therefore invited to contact our call center on 0464/076840 or write to [isuoniaccessibili@re-moove.it](mailto:isuoniaccessibili@re-moove.it) (WhatsApp 351 7181793)

# VILLA WELSPERG

## Assistance, services

REMOOVE staff will be on hand for the entire duration of the concert to provide assistance and support to anyone requesting it.

A special Infopoint will be set up at the entrance to the Villa (REMOOVE signs will be on site), as well as a sun-shielded waiting area near the concert venue.

A service for ensuring accessibility is provided with special REMOOVE bikes, which can be booked using the contacts provided in the previous chapter.

Finally, electric Zoom vehicles suitable for off-road transport will be made available free-of-charge for people with impaired mobility requesting them. This service will be provided for the parking lot-concert area journey, where spectators will then have to stay with their own mobility aid.

## Assistance, services

It will be possible to use the restrooms located in the building adjacent to the Villa. Access will be facilitated by the assistance of REMOOVE staff.

The entrance has a small step (3 centimeters) and the restroom for people with impaired mobility lacks a second grab rail.

## Listening

Thanks to the co-operation of the **Oriente Occidente Impresa Sociale-Ets**, the deaf or hard-of-hearing will also be able to enjoy the acoustic experience. REMOOVE will provide those who request them with **Subpac** devices, which are innovative audio-tactile instruments created for virtual reality experiences that are worn like backpacks and vibrate to the rhythm of the music, allowing sound perception through touch.

At the performances, thanks to the support of the **ENS-Ente nazionale Sordi**, (National Organization for the Deaf)'s experts, staff using sign-language will welcome the deaf spectators and explain how the Subpac works.

The availability of such devices is limited so those interested are invited to contact our call center on 0464/076840 or write to [isuoniaccessibili@re-moove.it](mailto:isuoniaccessibili@re-moove.it) (WhatsApp 351 7181793)
