

FOR THE CHILDREN

HOLIDAYING SAFELY

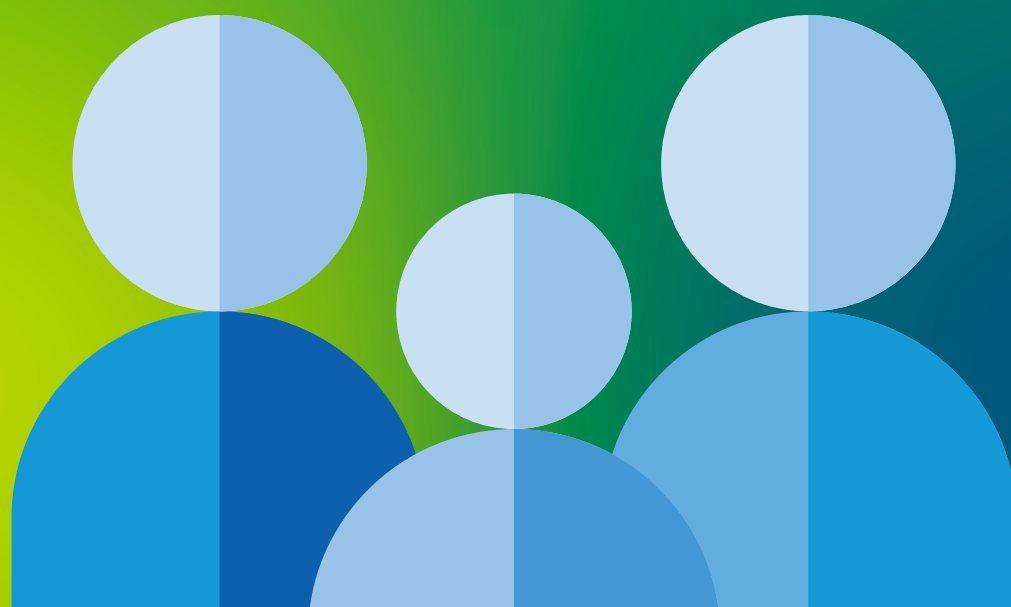

Holidaying safely in Trentino: Families with children

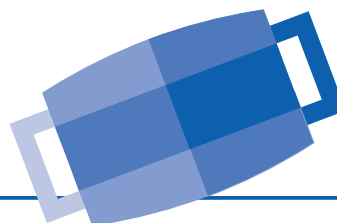

Trentino has always been an open-air playground: there's certainly no shortage of space, nature is a perfect playmate, and every day brings the chance for new experiences: from exploring the woods to visiting teaching farms, from climbing to diving in our Blue Flag lakes, from bicycle rides to themed walking routes, and from fascinating museums to mysterious castles. Not to mention the welcome, which is always attentive to the needs of younger guests and families. Now more than ever.

Here's a short guide we've prepared for you so that we can share a few extra tips for enjoying a calm, rewarding holiday while safeguarding everybody's health and safety.

What we're doing to take care of you

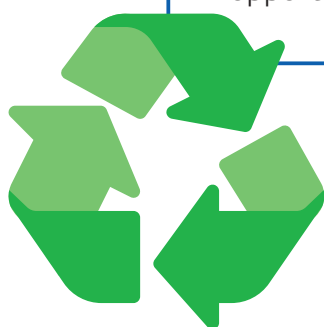

REMEMBER!

- Wearing a **mask** is obligatory in all public spaces and whenever it is not possible to maintain minimum safe distances. This is not the case for children under 6 years of age, with special exceptions, and for people with certified disabilities that prevent them from wearing a mask.
- **Minimum safe distancing** of 1 metre must always be observed. This is doubled when participating in sports (2 metres). Entrances to pools where people will be swimming may be limited and regulated to guarantee at least 7 cubic metres of water per person. This number changes to 4 cubic metres per person in pools where people will be enjoying the water but not swimming.

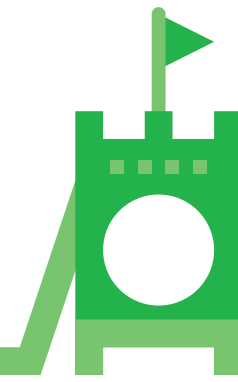

- As it is difficult for **children** to accurately assess distances and risks, particularly when they are playing outside, we recommend that you **supervise them carefully and help them** to observe distancing and all hygiene and behavioural rules, in a manner suitable for their level of independence and their age.
- It is also important to **correctly dispose of masks, gloves and tissues** in bins for **non-recyclable general rubbish**. Everybody has a responsibility to do so, and this is also an excellent opportunity to teach sustainable practices to your little ones.

Public playgrounds

- 
- The management of these spaces is under the responsibility of individual municipalities, which can decide whether or not to open them based on their ability to guarantee precautionary measures, for example regular sanitisation, for your safety and the safety of your children.
 - Remember that, even in these spaces, the rules for maintain safe distances and the prohibition to form gatherings must be observed.
 - We advise you to contact the **local tourist information office** to find out which playgrounds are open close to you.
 - The use of mask is obligatory when minimum safe distances cannot be guaranteed. Social distancing is not mandatory for members of the same household or social group.

Mini Club

In the facilities that provide mini club services, access can only be allowed to guests who stay at least 2 nights, with shifts of maximum 2 hours. Permanent groups will be formed to carry out the different activities. Outdoor activities will be prioritised, with distancing guaranteed and making sure not to form gatherings. For this reason, particular attention will be paid to the presence of operators, whose number will depend on the age range of the younger guests and, specifically:

- 1 operator for every 4 children from 3 months to 3 years
- 1 operator for every 6 children from 3 to 6 years
- 1 operator for every 7 children from 6 to 11 years
- 1 operator for every 10 children from 11 to 17 years

Consult the facility ahead of time!

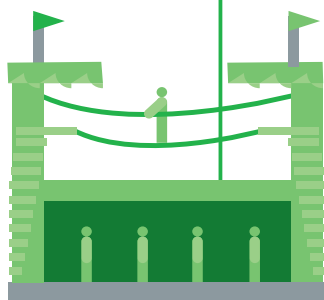

Public beaches

- Our lakes are suitable for swimming and guarantee **fun and relaxation**, thanks to private lidos and public beaches. You can find more information on the safety measures in place in these areas within our [dedicated guide](#).
- On public beaches, it is the responsibility of each individual to behave correctly, making sure to comply with safety measures in order to avoid heavy fines and guarantee their own well-being and that of others. **You can contact the local tourist information office** to find out which public beaches in your area are open for use.
- Do not form **gatherings**, wear your **mask** when you cannot **maintain a safe distance** of 1 metre when at rest or 2 metres when engaged in physical activity. Social distancing is not mandatory for members of the same household or social group.
- **Recreational activities** that can cause gatherings to form between people from different households are prohibited. Therefore, please monitor interactions between children carefully.

Adventure parks and theme parks

- These activities are deemed **low-risk**, as they entail waiting times and reduced gatherings even in the normal course of events. However, to make the most of them, we remind you to always book in advance and check with the managers regarding the procedures for admission, any registration required, and how the hiring of equipment, where necessary, works.
- Once again, it is necessary to maintain a distance of at **least 1 metre** from other users, including children. During physical activities, this increases to at least 2 metres.

Teaching farms

- Teaching farms have also been able to resume operating, with a special emphasis on **workshops** that can be conducted **outdoors**. All provisions intended to reduce the possibility of contagion apply in this situation too, i.e. **minimum distancing of 1 metre** and the use of a **mask** where this distance cannot be guaranteed. Workshops must be carried out in **small groups**, and children must be accompanied by an adult unless otherwise specified. In situations involving physical exercise, with or without animals, minimum safe distancing increases to 2 metres.
- Remember to **contact the establishment** in advance and check with the manager regarding how to access the farm and the conditions for taking part in workshops.
